

2026 Cradle Mountain Run

Timing information

SIAC card

- This year we are using SportIdent Air+ timing. This is a contactless timing system.
- Each runner will be issued with a SIAC (SportIdent Active Card).
- This card must be worn on your wrist.

SIAC and GPS

If you wear a GPS watch you must wear the SIAC on your opposite arm as interference may occur.

Card Activation

- Before you start the run, your SIAC must be **activated**. This is done by putting the tip of the card into the CHECK box. The card will beep and flash when activated.
- This will be done at the morning roll call. Be on time!
- If your card is not activated, it will not record any intermediate or finish times.
- All cards are programmed for a 6:00am start.

Intermediate splits

There will be intermediate splits taken at Pelion, Bert Nichols and Narcissus.

There will be a control unit for timing (pictured).

You will need to pass your arm with SIAC within 30 cm of the control.

A flash and series of beeps will confirm your time has been recorded.

Finish

- The finish will also be contactless.
- There will be two controls. You can use either control.
- You must pass the control within 30cm to record your finish time. Click on picture on right of screen to see a short video.
- Check for feedback.
- The finish control will turn off your SIAC.
- Once finished please take off your card and put it in the labelled box near the finish.

FAQ

Will the SIAC work through clothing?

The SIAC will work through layers of clothing. Listen for the feedback.

What if I lose my SIAC?

If you lose your SIAC you will be invoiced \$150 for a replacement SIAC.
